At the same time the cost of provisions and rates of wages are increasing, and what with European householder, we fear, may look forward to an increase of not much less than twenty-five per cent. taking place in the cost of living before very long.

> The presumed necessity for increased taxation of coursearises from the increase in the public expenditure, for which the unfavourable rate at which the colony now has to meet its obligations in gold for exchange compensation, pensions, and so forth, is in a large measure responsible. And perhaps the most galling feature in the situation is that out of every dollar that is raised to meet the deficiency the Imperial Government will appropriate 174 cents under the name of military contribution. It is becoming evident that a charge of 17 per cent, of its gross revenue for military contribution is a burden too heavy for the colony to bear, and if taxation is to go on increasing consideration will have to be given to the steps that may most effectively he taken to secure a reconsideration of the case at the

hands of the Imperial authorities. It must be rather exasperating to the Governor, on the eve of his retirement from the administration, to have to propose an in crease in taxation, especially if His Excellency recalls the glowing prospects he out in 1892 on the occasion of the presentation of diplomas , to the students of the Hongkong College of Medicine for Chinese. That institution was an applicant for financial assistance on the part of the Government, and His Excellency held out hopes that the public finances would soon be brought into such a condition as would justify compliance with the application. In every colony in which he had been, His Excellency said, he had been so extremely unfortunate as to arrive during a financial crisis, but in previous cases he had left them in easy circumstances, and he expressed his trust that by economy and good government Kojama and Dr. Tomatshi Ueno, are to go to he might hefore he left "these churming shores of Hongkong" be in a position to appounce that the endowment Per Case. Per Bot. of the College of Medicine had been granted by a willing Legislative Council. At the dinner in the evening His Excellency again spoke in a similar strain and anticipated that he would in a few months be able to -how a permanent saving of \$60,000 a year. So far from those anticipations having been fulfilled the cost of alministration has gone on steadily increasing and the strain has now become so great that increased taxation, though not actually lecided upon, is believed to be inevitable. His Excellency, we need hardly remark is not directly responsible for the misfortunes that have befallen the colony during his administration. The plague was a

that when the settlement of the militar contribution question was under considera tion he did not, before the decision was arrived at, claim on behalf of the colony soms rebate in respect of purely municipal revenue, inetead of allowing the claim to stand over uptil the final decision had been announced and had become practically irrevocable unless under pressure of something like a constitutional erisks. We hope, however, that even at this late hour His Excellency may be able to de something towards straightening out the colony's finances without having resort to the painful expedient of increased taxation.

Public attention was recently excited at Shanghai by a report that a child eleven years of age who had accidentally caused the death of his mother had been conveyed from his home at Kiukuei to Hoochow, where he was to be put to death by the lingchi or slicing process. Inquiries were made by the Rev. Dr. MUIRHEAD to ascertain whether the report was accumte or not, with a view to action being taken to prevent the carrying out of each a barbarous sentence in the event of its actually having been passed. The "thorities declared they never heard of the case, and averred the story was altogether "untrue, alike in reference to the supposed " murder and the punishment of the boy." As the N. C. Daily News remarks, all who are familiar with Chinese methods must be aware that the authorities would do their best to conceal the true facts of the case when they knew enquiries were being made by foreigners, and it is not surprising, therefore, that such enquiries should have failed to elicit the true state nffairs. A correspondent now communicates to our contemporary a letter from the Rev. D. L. ANDERSON, of Snochow, who confirms the fact that a boy about eleven years old was brought to Soochow from Kiukuei charged with having caused his mother's death and that he is now in the hands of the Prefect. The London and China Express says :- The King of Siam has terminated the first part of his visit to this country and gone to fulfil cartain engagements on the Continent. There no gainsiving that his Majesty has favourably impressed all with whom he has come in contact. Though the visit has not been of long duration his character has been appreciated, and the interest he has taken in our customs and sights has been shown by the intelligence of his questions and his anxiety for definite information. It is to be hoped that the King himself has been as favourably impressed, and that, whatever others may say, his Majosty may rely on the firm friendship of this country and assistance in carrying out the programme of reforms he has set himself to carry out in Siam.

TO THE EDITOR OF THE "DAYLY PRESS. Sir.—Not long ago the Shangual papers informed us that a boy of fourteen was to executed by what is known in China as the "slow, and painful nethod," for the murder or manslaughter of his mother. In the British Legation at Peking I have seen a Chinese official Gazette translated into English, in which are summerated the capital offences in China during a year and the punishments inflicted. I noticed that the punishment of lingchi was not particularly rare, and was carried out indiscriminately. on men and women, frequently lunatics, who were guilty of paricide, Talking to a Chinaman. however, on the subject, he appeared horrified punishment, and said it was impossible, being contrary to law. "Well," said I, "what will they do to him." "They will keep him," he replied, "till he is sixteen, when the punishment will be carried out!" It would be interesting to know whether such is the case, as it sounds incredible. We comfort ourselves with the thought of the poor devil being drugged with opium, but I am assured that this is frequently not the case. Perhaps one of your correspondents learned in the ways of Chinese can supply some information on the point. Yours
